SIZE 19 X 23.5 cm

PAGES 216

ILLUSTRATIONS 230 color and b/w

BINDING paper-bound

MATERIALS coated paper

WORDS OF TEXT about 80.000

A complete, up-to-date Dictionary of Opera, from Monteverdi to the present, in 8 thematic volumes, illustrated with rare images and photographs of performances, and presented with modern, innovative graphics. The volumes are enriched by splendid images of art directly connected to the stories of the operas, the historical-artistic context in which they were composed, or the biographical histories of their protagonists. The volumes on the Operas offer a detailed and complete overview of the milestones of the history of the art.

The individual works are described in technical profiles (title, composer, librettist, place and date of first performance), plot summaries and historical-critical comments. The volumes on the protagonists of the history of opera (singers, composers, conductors, librettists) are conceived as biographical notes including information on training, debuts, main performances, critical reception and musical career. The series is completed by indices and apparati, containing a selected discography and information on the main opera festivals.

A complete, up-to-date dictionary of opera: operas, singers, conductors, composers and librettists.

A richly illustrated work for easy reference, with over 1800 images, to learn more about the fascinating world of music.
